10. A l'extérieur, veuillez à vous protéger des brûlures du soleil par des lotions UV
11. Si vous souhaitez vous rendre à la piscine, vous pouvez trouver des tickets au département Logistique au prix de \$50NT.

Linkou, where our camping site is located for the first few days of the Moot, is a terrace consisting of laterite. It stands at the northwestern side of Taiwan next to the Taiwan Strait. Influenced by the monsoon, the weather in Linkou is especially cold and rainy in winter.

Linkou lies between CKS International Airport, the international gate of Taiwan, and Taipei City, the largest metropolis on this island. With the accessibility of the locality and the less dense population, this area used to be one of the governmental projected suburban areas.

Standing aside from the freeway is Chang Gung Memorial Hospital Linkou Branch, which was established by the Formosa Plastic Group, and now the largest hospital in Taiwan. Also, a new science park is located

in the neighborhood. The largest Notebook manufacturer, Quanta, and rapidly growing computer manufacturer, BenQ, are all based in this science park.

The two universities where we are staying are the Chang Gung University and the National College of Physical Education and Sports. The former is founded by the Formosa Plastic Group; the latter is the academic sports center of Taiwan. Moreover, the National College of Physical Education and Sports is where the 5th Asia-Pacific Venture was held from July 4 to 10, 2002. Thousands of scouts between 14-18 years old from Asia Pacific gathered together to participate in this activity. Some wonderful images are shown as follows.

Welcome to Taiwan. We do wish that all of you enjoy the Moot!(Porfu Chen)

本次大會活動將從台北林口揭開序幕。林口位在台灣的西北邊，鄰近台灣海峽，位處台北盆地的邊緣，屬於台地地形。受到東北季風的影響加上台地地形所致，林口的冬天特別的溼冷。鄰近台北、交通便利，於是林口成為政府都市計畫中台北市的衛星城市。由中正國際機場往台北方向，大約二十分鐘的車程即能抵達林口。

林口除了有著名的長庚醫院之外，另外還有華亞科技園區。像是筆記型電腦的大廠—廣達，帶著台灣資訊產品走向國際的明\_電通等，都雲集於此。華亞科技園區規模沒有新竹科學園區那麼大，但因毗鄰首善之區，乘地利之優勢也成為一個主要開發地區。

除了工業園區之外，林口也是台灣體育教育的重心；中正體育園區，國立台灣體院都位於此。另外，台塑集團也在此設立長庚大學、長庚技術學院，為台灣的醫學發展及工業技術的發展培育更優秀的人才。

因為交通的便利及政府有計畫的開發，整個林口的規劃是相當完整的。兩千零二年亞太地區的行義大會也是在這裡舉行的；經過那次美好經驗，希望這次大會在林口展開也讓每個人都有個美好的回憶。
